Lebanon · Open to remote & relocation

Profile Full-stack developer who builds production SaaS end to end, from Postgres schema and auth to payments, testing and deployment, with security designed in from day one. Lead developer of esthéJob, a live B2B marketplace in France, and security lead on its companion booking platform.

- Experience**
- Founding Full-Stack Developer** · esthéJob, [esthejob.fr](#) May 2026 – Present · Remote, France
- Took a live B2B marketplace for French beauty and hairdressing salons **from prototype to production**, writing nearly 90% of the codebase (79 pages, 145 database migrations)
 - Built multi-role dashboards, a job board, messaging, hiring workflows, server-side PDF generation, video interviews, Stripe payments and a feature-flagged second vertical
 - Set up the quality pipeline: **120+ Playwright end-to-end tests**, GitHub Actions CI with custom contract checks, post-deploy smoke tests, Sentry and PostHog
 - **Merged two production apps onto one shared database with a single login** across two domains, rehearsed on staging before the cutover
- Stack Next.js, TypeScript, Supabase (PostgreSQL, Auth, RLS), Stripe, Tailwind, Playwright, Vercel
- Security & Integration Lead** · esthéJob Cowork, [cowork.esthejob.fr](#) Sep 2026 – Present
- **Audited the backend** of a live booking and subscription SaaS and fixed the findings: Content Security Policy, Cloudflare Turnstile, tighter database privileges, server-only token lifetimes
 - Fixed **race conditions** in promo-code reservations and refunds with atomic PostgreSQL functions; hardened sign-up, password and email-link flows
- Frontend Developer (Contract)** · OEG Outsourcing Jan – Feb 2026 · Mount Lebanon
- Built a client-facing SharePoint Online interface (document libraries, task lists, calendars) from stakeholder requirements
- Freelance Full-Stack Developer** · Clothing factory POS, [GitHub](#) Jan 2024 – Jun 2025
- Designed, built and deployed on my own a POS and factory management system **used daily across 4 stores and a production facility**: billing, inventory and cross-store reporting
- Stack React, Node.js, Express, MySQL
- Freelance Full-Stack Developer** · Dakdouk Global Gate, [GitHub](#) Jan – Dec 2024
- Built a **live e-commerce platform** for a multi-branch retailer in Lebanon: storefront, checkout with payment and delivery, customer messaging and an admin dashboard on a Node.js/Express REST API
- Stack React, Node.js, Express, MongoDB, JWT
- Computer Science Lab Assistant** · University of Balamand Sep – Dec 2023

- Projects**
- WarAI** · AI survival assistant for conflict zones 2026 · In development
- Bilingual Arabic/English assistant with an **offline RAG fallback** (TF-IDF) so it works without internet
 - Ran a **black-box penetration test** (Kali, sqlmap, jwt_tool): found prompt injection, JWT revocation failure and rate-limit bypass, documented with proof of concept and fixes
- Stack Next.js, Express, SQLite, Groq (LLaMA 3.3 70B), Leaflet
- AutomatedPOS** · delivery order bridge, solo 2026 · In development
- Copies Toters delivery orders into restaurant POS systems or kitchen printers: adapter architecture, Zod-validated orders, restart-safe deduplication, two-step total checks, audit log
- Stack TypeScript, Node.js, Zod

- Skills**
- Frameworks** TypeScript, JavaScript, React, Next.js, Node.js, Express, Tailwind CSS
- Data & APIs** PostgreSQL, Supabase (Auth, RLS), MySQL, MongoDB, SQLite, Stripe, REST APIs, Zod
- Quality & ops** Playwright, Vitest, GitHub Actions, Vercel, Sentry, PostHog, Git
- Security** Web app pentesting, OWASP Top 10, RLS, CSP, JWT, Kali Linux, sqlmap, jwt_tool
- AI · Languages** Claude API, Groq, RAG · Arabic (native), English (fluent)

Education **BSc in Computer Science** · University of Balamand, Lebanon 2021 – 2024
