

Robin Hmaidan

Full-Stack Developer · Next.js · TypeScript · PostgreSQL · Web Security

robinhmiadan01@gmail.com · +961 78 883 403 · github.com/Robin-Hmaidan · Lebanon · Remote or relocation

PROFILE

Full-stack developer with a BSc in Computer Science who builds and ships production software for paying clients. Lead developer of **esthéJob**, a live French marketplace for the beauty and hairdressing industry (**esthejob.fr**), and security lead on its companion booking SaaS (**cowork.esthejob.fr**). Comfortable owning a product end-to-end: database design, APIs, UI, payments, testing, deployment and monitoring. Security-minded: Row Level Security design, backend security audits and hands-on web pentesting.

1,500+ commits shipped in 5 months	2 live production products	120+ end-to-end test scenarios	145 PostgreSQL migrations
--	--------------------------------------	--	-------------------------------------

EXPERIENCE

Founding Full-Stack Developer May 2026 – Present
esthéJob — [esthejob.fr](#) Remote · France

- Lead developer of a **live B2B marketplace** connecting beauty and hairdressing salons with freelance professionals for replacements and cabin rental. Built it from prototype to production: **79 pages, 145 database migrations**
- Delivered multi-role dashboards (salons, freelancers, admin), a job board with sector filters, messaging, application workflows, a **CV builder with server-side PDF generation**, video interviews (Daily.co), maps (Leaflet) and Stripe payments
- Set up the quality pipeline: **120+ Playwright end-to-end scenarios**, GitHub Actions CI (type-checking, lint baseline, custom contract checks), post-deploy smoke tests, and production monitoring with Sentry and PostHog
- Merged the job board and the Cowork SaaS onto one shared database with a single login** across two domains, rehearsed on staging before the production cutover (Sep 2026)
- Shipped a feature-flagged expansion into a second business vertical (hairdressing) and a 15-phase design-system migration, turning the product designer's high-fidelity prototypes into production UI

Next.js (App Router) · TypeScript · Supabase (PostgreSQL, Auth, RLS) · Stripe · Tailwind · Playwright · Vercel

esthéJob Cowork — **cowork.esthejob.fr** · **Security & integration lead** Sep 2026 – Present

- Ran a **backend security audit** of the booking and subscription SaaS and wrote the report, then fixed the findings: Content Security Policy with violation reporting, Cloudflare Turnstile on public forms, tighter database privileges, server-only token lifetimes
- Fixed **race conditions** in promo-code reservations and refunds using atomic PostgreSQL functions, and hardened the sign-up, password and email-link flows for the shared account system
- Cleared all 39 React lint errors without changing behaviour; integrated Sentry error tracking

Next.js · Supabase · Stripe · Claude API · Vitest · Sentry · Cloudflare Turnstile

Freelance Frontend Developer (Contract) Jan 2026 – Feb 2026
OEG Outsourcing — **SharePoint Online** Mount Lebanon

- Designed and built a client-facing SharePoint Online interface with responsive layouts for document libraries, task lists and calendars
- Worked with stakeholders to turn business requirements into clear, usable UI

Freelance Full-Stack Developer Jan 2024 – Jun 2025
Multi-Store POS System — **Clothing Factory** · [GitHub](#) Remote

- Built and deployed a POS and factory management system **used daily across 4 stores and 1 production facility**
- Developed billing, inventory flows and cross-store statistics, giving management real-time visibility of operations
- Owned the full architecture, client requirements, iterations and production deployment on my own

React · Node.js · Express · MySQL

Freelance Frontend Developer

Jan 2024 – Dec 2024

E-Commerce Platform — Toy Store · [GitHub](#)

Remote

- Built a client-facing e-commerce site with product listings, shopping cart and an integrated delivery system
- Developed responsive React interfaces connected to REST APIs for order and delivery management

Computer Science Lab Assistant

Sep 2023 – Dec 2023

University of Balamand

Lebanon

- Supported students in Java and Data Structures labs: explained concepts and helped them debug

PROJECTS

WarAI — AI Survival Assistant

2026 · In development

- Bilingual (Arabic/English) AI assistant for civilians in conflict zones, with an **offline RAG fallback** (TF-IDF) so it works without internet
- **Black-box penetration test** with Kali Linux, sqlmap and jwt_tool: found and documented 3 vulnerabilities (prompt injection, JWT revocation failure, rate-limit bypass via IP spoofing) in a report with proof-of-concept commands and fixes

Next.js · Node.js · Express · SQLite · Groq API (LLaMA 3.3 70B) · Leaflet

AutomatedPOS — Delivery Order Bridge

2026

- Service that copies confirmed delivery-app orders (Toters) into restaurant POS systems or straight to the kitchen printer, so cashiers stop retyping orders
- Adapter architecture (one adapter per platform or POS), Zod-validated order model, deduplication that survives restarts, two-step total verification and an audit log for end-of-day reconciliation

TypeScript · Node.js · Zod

SKILLS

Frontend	React, Next.js (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, shadcn/ui, HTML, CSS
Backend	Node.js, Express, REST APIs, Supabase (Auth, RLS, Storage, RPC), Stripe, Zod, JWT authentication
Databases	PostgreSQL, MySQL, SQLite, MongoDB, Firebase
Testing & Ops	Playwright, Vitest, GitHub Actions, Vercel, Sentry, PostHog, Git
Security	Web application pentesting, OWASP Top 10, Row Level Security, Content Security Policy, JWT attacks, SQL injection, rate-limit bypass, prompt injection, Kali Linux, sqlmap
AI	Claude API, Groq API, RAG, AI-assisted development (Claude Code)
Languages	Arabic (native), English (fluent)

EDUCATION

BSc in Computer Science

2021 – 2024

University of Balamand

Lebanon
